Match the test to the built configuration

The request concerns unit U1 after BUILD-3, under condition K1. This original exercise uses invented equipment and records.

Original record	Supported relationship	Review decision
BUILD-1 records U1 with M1/S1. TEST-1 concerns M1/S1 under K1.	The earlier test has a stated unit, configuration and condition.	Retain TEST-1 within its recorded scope.
PLAN-2 proposes M2/S2. No execution record is supplied.	A proposed configuration exists. Execution remains unresolved.	Do not apply the proposal as the installed configuration.
BUILD-3 executes M3/S1 after TEST-1. No later test is supplied.	M3/S1 is the later executed configuration. A matching test is absent.	Request the test evidence needed for M3/S1 under K1.

Write the reviewer key

Accept BUILD-3 as the later configuration. Preserve PLAN-2 as a proposal. TEST-1 remains tied to M1/S1, even though the unit identifier U1 is unchanged.

Plan an original sample

Operation and model decision _____

Unit, components, software, revision and test condition _____

Independent reviewer and cases held out from training _____

Source owners, permitted use and exclusions _____

Choose the commercial collection

Identify whether the buyer wants operating records, authorized new capture or another agreed source. Confirm the brief before expanding. Keep staged exercises labeled and use specialist review where the task requires it.
