Keep each piece tied to its evidence

Follow parent material, executed cuts and sample identity. This original case uses invented records and can be demonstrated with paper props.

Original record	Supported relationship	Review decision
SOURCE-A identifies sheet S1. CUT-1 executes pieces A1 and A2.	A1 and A2 have recorded parent relationships to S1.	Preserve both child identifiers and the executed cut event.
TEST-1 measures sample Q1 taken from A1.	The test is directly linked to Q1 and A1. Its stated scope is retained.	Do not assign the measured result to A2 from shared parentage alone.
PLAN-2 proposes P1 and P2. PHOTO-R shows an unmarked remnant.	Plan execution and the remnant source remain unresolved.	Request the execution or identity evidence needed for each claim.

Write the reviewer key

Accept the two CUT-1 relationships. Keep TEST-1 tied to Q1 and A1. Flag a result extended beyond its evidence, a proposed cut treated as executed, or a remnant identified from appearance alone.

Plan an original sample

Operation and model decision _____

Parent, child, sample and effective record versions _____

Independent reviewer and cases held out from training _____

Source owners, permitted use and exclusions _____

Choose the commercial collection

Identify whether the buyer wants operating records, authorized new capture or another agreed source. Confirm the brief before expanding. Keep staged exercises labeled and use specialist review where the task requires it.
