Check the parts as well as the count

ORDER-1 requires kit K1 with A-left, A-right and B-center, one of each. This original exercise uses invented records and paper props.

Original record	Supported relationship	Review decision
PACK-1 records A-left, A-left and B-center.	Three parts are recorded. A-left is duplicated and A-right is absent.	Correct count, incorrect component set.
PHOTO-1 hides the A identifiers. Linked VIEW-2 shows both as A-left.	The first view leaves variant identity unresolved. The second resolves it.	Cite the view establishing each identity.
DECLARATION-B concerns B-center material only.	The statement has component-specific scope.	Keep the material claim within its documented scope.

Write the reviewer key

Flag the missing A-right, preserve PHOTO-1's identity gap and cite VIEW-2 for the observed mismatch. Add a complete second kit to test supported confirmation.

Plan an original sample

Operation and model decision _____

Kit, required components, source views and declarations _____

Independent reviewer and cases held out from training _____

Source owners, permitted use and exclusions _____

Choose the commercial collection

Identify whether the buyer wants operating records, authorized new capture or another agreed source. Confirm the brief before expanding. Keep staged exercises labeled and use specialist review where the task requires it.
