Test an AI answer against public records

Start with an original case. Give the reviewer a separate answer key, the version that applies and the allowed use for each source.

Fictional source	What the answer should say	What to score
Draft V1 proposes a June 1 change to an administrative form.	Treat June 1 as proposed. Look for the signed record.	Distinguishes proposal from adoption.
Signed V2 applies June 15 to Department A only.	On June 20, Department A uses the changed form. Cite signed V2.	Version, date and department scope.
An index points to a Department B notice with no attachment.	Flag the missing source. Department B instructions are unresolved.	Separates the index from its missing document.

Plan the test and record permissions

Document ID, version and issuing role _____

Publication date, effective date and scope _____

Expected response and missing evidence _____

Publisher, owner, terms and reviewer _____

Before sharing

Use original scenarios or an authorized release. Document applicable reuse terms and any third-party content. Keep personal records, nonpublic material and controlled information outside the sample. Ask the authorized office to review any real export.
