Test a wholesale receiving handoff

Keep ordered, packed and received quantities separate. This original case has a partial receipt and an unknown package conversion.

Fictional source	What the record establishes	Reviewer label
ORDER-1 requests two cases of A and one case of B.	The quantities were ordered. It does not prove shipment or receipt.	Ordered quantities and source identified.
PACK-1 says one case of A contains six units. B has no conversion.	A case-to-unit basis is documented for A only.	A conversion supported. B individual count unresolved.
RECEIPT-1 records one A case and one B case.	One A case is received, equal to six units. One ordered A case is unconfirmed.	Partial receipt preserved. No inferred receipt from the packing list.

Plan the sample and source permissions

Item, package level, lot and event identifiers _____

Order, shipment and receipt evidence _____

Missing quantity or conversion basis _____

Source owners, permitted use and reviewer _____

Before sharing

Use original forms, labels and inert props first. Keep supplier-only records, contracts, pricing and customer identities outside the pilot. Agree on the buyer's task specification and document who can authorize each linked source.
